732-351-9102 Union Beach, NJ, 07735, United States

Aspiring software developer with a passion for problem-solving and expertise in full-stack development. Currently mastering JavaScript, Python, React, and Node.js through hands-on projects. I excel in collaborative environments and I am eager to connect with professionals to drive technological advancements.

Work Experience

Springboard Full/Backend Software Engineer Student   **Dec 2023-Present**

- Designed and developed a full-stack online bookstore using React.js for the front end and Node.js for the back end.
- Built and optimized RESTful APIs with Express.js and MongoDB to manage user data, book collections, and transactional operations.

Projects

Random Card Generator   **Jul 2024 - Jul 2024**

A JavaScript project that involves making API requests using Promises and displaying data on a webpage. The project dynamically displays a random card image when a button labeled "Gimme A Card!" is pressed.

Book Search & Wishlist Application   **Jul 2024 - Aug 2024**

Developed the backend using Node.js and Express.js to handle server-side operations, manage user data, and interface with MongoDB for storing book collections and user information.

Education

Springboard

Software Engineering Certificate Software Engineering   **Dec 2023-Present**
